EXACTLY WHAT IS A NURSE PRACTITIONER?

Also called an ARNP, the Advanced Registered Nurse Practitioner is an RN who has a master’s or doctorate degree in nursing and is nationally board certified to diagnose and treat health conditions.

We provide a broad range of services, such as:
• Taking histories and performing physical assessments
• Writing prescriptions
• Ordering lab tests and procedures
• Developing and managing individualized care plans
• Coordinating consultations and referrals
• Promoting health activities, educating patients and their families in proper care

Nurse practitioners may provide primary care independently, but we often complement the family doctor's services. We collaborate with your doctor and keep him or her updated on your health situation. If a higher level of care is needed, we will facilitate referral and transfer.
Health care where you need it. Health care when you need it

PERSONAL, INDIVIDUALIZED CARE
Our goal is to partner with you and your family, no matter how young or old. Our approach is holistic, considering the whole person, not just the sickness. By familiarizing ourselves with your special health needs, we can help you manage ongoing conditions as well as timely evaluation and treatment of acute illnesses.

We take the time to listen to your concerns and answer your questions. Your needs and wishes will always be our primary focus.

WILL INSURANCE COVER THE COST?
Medicare and Medicaid cover the cost of nurse practitioner services. Most major health insurance companies cover these services as well. We’ll be happy to check for you.

LET US TAKE THE HASSLE OUT OF YOUR HEALTH CARE
We are proud to deliver to your door the best advanced nursing care, solidly supported by the resources of the University of Iowa College of Nursing. Call us today to learn how we can help you or someone you love.

HEALTH CARE WHERE YOU NEED IT
UI College of Nursing Health Care provides health care services to individuals where they live. Whether that's a house, apartment, retirement home, assisted living facility or nursing home, our nurse practitioners come to you to assess, diagnose and treat your health-related needs.

HEALTH CARE WHEN YOU NEED IT
We'll see you on a scheduled basis and when problems arise. You avoid the bother of scheduling an appointment, arranging transportation and long waits in the office. You can stay home and avoid more serious health problems.

WHO CAN BENEFIT FROM A NURSE PRACTITIONER HOUSE CALL?
- Older adults
- Individuals with disabilities
- Children with special needs
- Those with ongoing health issues such as diabetes
- Residents of long-term care and/or assisted living facilities
- Anyone for whom getting to a doctor’s office is difficult
